

# Scanning for Kindle, iPad, Nook and other eReader devices

## Convert Your Catalog for Electronic Distribution

If you have not begun selling your catalog of books electronically, now is the time to act. Millions of Kindles, Nooks and iPads have been purchased by consumers, and Digital Scanning can assist with bringing your titles to this exploding marketplace.

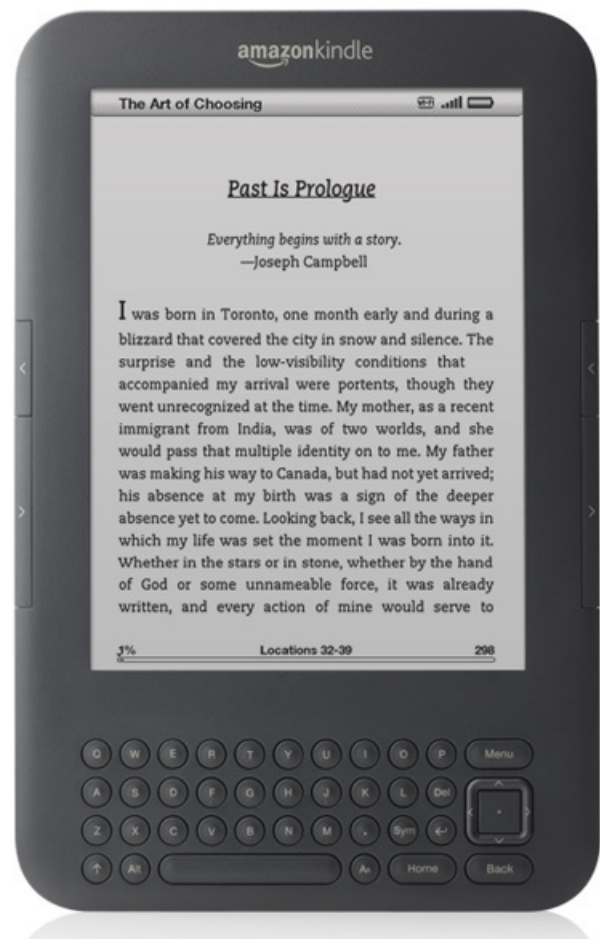

## The DSI Conversion Process

- Ship your books to DSI
- Books are disbound and scanned
- Optical Character Recognition (OCR) software is used to convert the scanned images into editable text
- OCR-generated text is reformatted for readability on eReader devices
- A table of contents is generated
- Cover is scanned and resized
- Cover, table of contents and text are combined into the final eBook file

## What You Get

DSI will provide you with a fully formatted eBook file, complete with cover and hyperlinked table of contents. This file will be ready for you to submit to the eBook store (s) of your choice.

Should you need to edit the book, DSI will send you the text file and cover image, allowing you to edit and format the material as you choose.
